London Southend Airport (LSA) Station recognises its responsibility to manage the environmental impacts of our activities, products and services in all areas of our business and is committed to:

- Satisfying regulatory, statutory, customer and all other applicable environmental requirements.
- Protecting the environment including the prevention of pollution and the protection of species and ecosystems where we work.
- Identifying significant environmental aspects and subsequent impacts to planned, new or modified work activities.
- The continual improvement of our Environmental Systems and enhancing performance through ongoing review.
- Specifically minimising the environmental impact for the life cycle; (including disposal) of plant, equipment and other physical assets owned by the company.
- Supporting industry initiatives to improve environmental performance and contribute to a sustainable railway including, where appropriate, gathering data to meet the industry's KPI objectives.
- Taking appropriate opportunities to minimise waste and to re-use and recycle materials whilst considering new technologies and best practice where appropriate.
- Verifying that suppliers, contractors and partners meet our stated policy requirements and adopt a conscientious approach to environmental issues.
- Cooperating with, responding to and recording the views of interested parties including stakeholders, customers and the general public.

The Chief Executive Officer and Directors fully support this policy and will actively communicate and promote the importance and relevance of it and our Environmental Systems to all our staff.

To meet our commitments all staff must comply with the statutory duties placed upon the business and in addition to the requirements documented within our Operating Procedures and Operating Instructions within our Safety Management System.

This Environmental Policy will be made available to all staff and to interested parties upon request.

This Environmental Policy shall be reviewed as a result of significant changes to environmental requirements or at least annually by the Chief Executive Officer.
